Custom Mobile Professional Spaces—Built at the Highest Level of Quality

We build the best in customized mobile commercial and specialty office spaces and transporters. That's why we chose the name High Level Enterprises. We have many of the top talented workers in the industry. Read on to find out more, then contact us for any questions.

From mobile shower units to medical exam offices and mobile dentistry, we build top-quality buses and trailers for healthcare organizations throughout the US.

We can do everything from simple single donor lounge or phlebotomy chair units to large multi-lounge vehicles with slide outs, spacing for Trima Accel machines, and back-up generators.

We custom build every unit to fit the client's needs and to fit the vehicle of choice. We have experience building on vehicles as small as Ford E-350s to large Freightliner S2Cs.

Working hand in hand with our clients, we can pre-wire and/or install additional, customer supplied equipment, like blood shakers, Trima Accel units, medical equipment, computers, etc.

There are many options for each vehicle, depending on the demand or need from the client. Optional equipment includes back-up generator, exterior lighting, exterior TV, awning with screen room, white noise machine, storage for blood coolers, just to name a few.

COMFORTABLE SPACE

We utilize as much space as possible for our clients, including the request to add slide outs into our vehicles to accommodate more donor lounges.

INTERIOR DESIGN

Our vehicles come standard with solid wood cabinets, designed to last beyond the life of your clinic. Laminated or upgraded Corian solid surface countertops provide easy to clean surfaces.

IN-HOUSE GRAPHICS

We design, print, and install graphics at our manufacturing facility in Elkhart. We can use your files, create new designs, install reflective, and more.

Built at the Highest

Level of Quality

“We don’t build 25 per day,” says Brandon Maynard, General Manager of High Level Enterprises – pointing out that quality is more important than quantity. “We are an experienced, lean machine where we take the time to build the custom quality unit that people can count on.”

Brandon, the General Manager, has over 25 years of experience in the specialty vehicle and trailer manufacturing industry. He has worked for major manufacturers, such as Glaval Bus, Forest River, and Monaco Coach. He has a passion for creating innovative and unique solutions for HLE, Inc. clients. He can be contacted via email at brandon@hleinc.net.

Creasy, the Project Designer, has worked in the RV industry for 26 years, with the last 18 years as main project designer for specialty vehicle manufacturers. She works with the clients after the sale to update them on build status, photos, meetings, and more. She can be contacted via email at creasy@hleinc.net.

Justin Miller is the Lead Engineer at High Level Enterprises Inc. (HLE). Justin works directly with customers and dealers to provide 3D conceptual models and floorplans that depict the intent of HLE for each given project. He has a strong Engineering background, from Architectural to Mechanical Engineering, with 9 years of experience in the RV industry. He can be contacted via email at justin@hleinc.net.

Daniel Shaw, Sales and Marketing, has worked for the last 10 years in retail sales, graphic design, and marketing. He works closely with customers over the course of their entire project, including the installation of graphics at the end. He also handles the social media accounts for HLE, Inc. He can be contacted via email at daniel@hleinc.net.
