Custom Mobile Professional Spaces—Built at the Highest Level of Quality

We build the best in customized mobile commercial and specialty office spaces and transporters. That's why we chose the name High Level Enterprises. We have many of the top talented workers in the industry. Read on to find out more, then contact us for any questions.

High Level Enterprises designs and builds custom modified security units and mobile prison and jail incarceration vehicles for private and state-owned facilities throughout the US.

We can do everything from simple steel caging to complex transport vehicles with segregated prisoner areas, camera systems, fire arm securement, and more.

We custom build every unit to fit the client's needs and to fit the vehicle of choice. We have experience installing cage systems in vehicles as small as Ford E-350s to as large as Freightliner S2Cs.

Our cages are made from 9-gauge steel expanded metal, steel tubing and angles, and custom fabricated pieces. Everything is assembled with tamper-proof fasteners or welded in place. Optionally, we can add .25 inch Lexan in clear or smoke, to our walls.

Custom fabrication includes window caging or bars, caging for heaters, air conditioners, escape hatches, and shackle D-Rings.

EXTERIOR WINDOW BARS

These custom welded bars can be added to most any prisoner transport unit. They can be painted to match the vehicle exterior.

INTERIOR WINDOW CAGING

Our interior window caging is mounted within the window frame. This option allows for a more stealth approach to the overall look of the vehicle.

TAMPER-PROOF FASTENERS

We custom fabricate brackets for our caging walls. Any assemblies or joints that are not welded are secured with tamper-proof screws.

Built at the Highest Level of Quality

“We don’t build 25 per day,” says Brandon Maynard, General Manager of High Level Enterprises – pointing out that quality is more important than quantity. “We are an experienced, lean machine where we take the time to build the custom quality unit that people can count on.”

Brandon, the General Manager, has over 25 years of experience in the specialty vehicle and trailer manufacturing industry. He has worked for major manufacturers, such as Glaval Bus, Forest River, and Monaco Coach. He has a passion for creating innovative and unique solutions for HLE, Inc. clients. He can be contacted via email at brandon@hleinc.net.

Creasy, the Project Designer, has worked in the RV industry for 26 years, with the last 18 years as main project designer for specialty vehicle manufacturers. She works with the clients after the sale to update them on build status, photos, meetings, and more. She can be contacted via email at creasy@hleinc.net.

Justin Miller is the Lead Engineer at High Level Enterprises Inc. (HLE). Justin works directly with customers and dealers to provide 3D conceptual models and floorplans that depict the intent of HLE for each given project. He has a strong Engineering background, from Architectural to Mechanical Engineering, with 9 years of experience in the RV industry. He can be contacted via email at justin@hleinc.net.

Daniel Shaw, Sales and Marketing, has worked for the last 10 years in retail sales, graphic design, and marketing. He works closely with customers over the course of their entire project, including the installation of graphics at the end. He also handles the social media accounts for HLE, Inc. He can be contacted via email at daniel@hleinc.net.
