Custom Mobile Professional Spaces—Built at the Highest Level of Quality

We build the best in customized mobile commercial and specialty office spaces and transporters. That's why we chose the name High Level Enterprises. We have many of the top talented workers in the industry. Read on to find out more, then contact us for any questions.

We manufacture secure and safe mobile medical units for use among drug treatment organizations, featuring an optional exam room, administration area with a safe, and a waiting room.

We can do everything from simple dispensaries to high security vehicles with alarm systems and camera systems on-board.

We custom build every unit to fit the client's needs and to fit the vehicle of choice. We have experience building on vehicles as small Ford E-350s to large Freightliner S2Cs.

Working hand in hand with our clients, we can pre-wire and/or install additional, customer supplied equipment, like DEA approved safes, dispensary equipment, and more.

There are many options for each vehicle, depending on the demand or need from the client. Optional equipment includes water dispensers, white noise machines, extra speakers, external TVs, awnings, bulletin boards, just to name a few.

SPECIAL REQUESTS

We utilize as much space as possible for our clients, including the request to use the driver's seat as an additional office/intake area, or adding a restroom.

SECURE AREAS

Our treatment clinics have solid-core doors, automatic closers, commercial grade non-keyed alike lock set and deadbolt, and Lexan window with small openings.

ADDITIONAL EQUIPMENT

We can install specialty equipment, like printers and scanners, DEA safes, specimen pass-thru, and medical equipment. Every unit comes with a complete owner's manual and video walk-thru.

Built at the Highest Level of Quality

“We don’t build 25 per day,” says Brandon Maynard, General Manager of High Level Enterprises – pointing out that quality is more important than quantity. “We are an experienced, lean machine where we take the time to build the custom quality unit that people can count on.”

Brandon, the General Manager, has over 25 years of experience in the specialty vehicle and trailer manufacturing industry. He has worked for major manufacturers, such as Glaval Bus, Forest River, and Monaco Coach. He has a passion for creating innovative and unique solutions for HLE, Inc. clients. He can be contacted via email at brandon@hleinc.net.

Creasy, the Project Designer, has worked in the RV industry for 26 years, with the last 18 years as main project designer for specialty vehicle manufacturers. She works with the clients after the sale to update them on build status, photos, meetings, and more. She can be contacted via email at creasy@hleinc.net.

Justin Miller is the Lead Engineer at High Level Enterprises Inc. (HLE). Justin works directly with customers and dealers to provide 3D conceptual models and floorplans that depict the intent of HLE for each given project. He has a strong Engineering background, from Architectural to Mechanical Engineering, with 9 years of experience in the RV industry. He can be contacted via email at justin@hleinc.net.

Daniel Shaw, Sales and Marketing, has worked for the last 10 years in retail sales, graphic design, and marketing. He works closely with customers over the course of their entire project, including the installation of graphics at the end. He also handles the social media accounts for HLE, Inc. He can be contacted via email at daniel@hleinc.net.
